

Luftvägsregistret

This unit is connected to the national quality register for asthma and COPD.

● The purpose of the register

To improve asthma and COPD care, and to ensure equal care throughout the country.

● You are contributing to better care

By being part of the Airways Register, you are contributing to better asthma and COPD care in the country.

You are protected by confidentiality

- Your data in the Airways Register is protected by confidentiality, and is treated in the same way as medical records, in accordance with the Patient Data Act.

● Your rights as a patient

You can have your data removed or decline participation in the register. If you would like more information about the registers, you can contact the care unit's patient data representative or the personal data representative for their respective quality registers.
